

Programming using **C**

Highlights 02:: Memory address

```
/* to print memory address of number*/  
  
#include <stdio.h>  
  
#include <conio.h>  
  
main()  
{  
  
    int num = 30;  
  
    printf("\nvalue of number :%d", num);  
  
    printf("\naddress of number: %d", &num);  
  
    getch();  
  
}
```
