

Programming using C

Highlights 04:: Relational operator

```
#include <stdio.h>
#include <conio.h>
main()
{
    int x = 19, y = 20;
    printf("\n is x > y ? %d", x > y);
    x++;
    printf("\n is x = y ? %d", x == y);

    x++;
    printf("\n is x = y ? %d", x == y);
    getch();
}
```
